## SKILLS

### Everyday business systems

.NET and C#, ASP.NET Web API  
and MVC, SQL Server, Angular,  
JavaScript and TypeScript,  
HTML and CSS, WordPress,  
CMS integrations, localization  
workflows, Azure DevOps and  
CI/CD, Windows and IIS servers.

### Modern web, cloud and integrations

Node.js, React and Next.js,  
PostgreSQL, MySQL, MongoDB,  
GraphQL, Docker, Azure, AWS  
(EC2, S3, Lambda), GitHub  
Actions, third-party APIs with  
OAuth2 and webhooks,  
payments with Stripe and  
MercadoPago, BigQuery, GDPR  
data deletion with an audit trail.

### AI for your business

I use Claude Code, Cursor and  
the Claude extension in Visual  
Studio every day. I've built with  
the Claude API, an AI sales  
agent inside ComerclApp, and a  
local model (Ollama) connected  
to real app data. I keep training  
on this, and an Anthropic  
certification is next on my list.

## EDUCATION

Technical high school,  
Computer Science. Fray Luis  
Beltrán, 2006-2008  
Systems analysis studies. ISFT  
N°38, 2008-2010  
Computer systems engineering  
studies. UAI Rosario, 2011-  
2012

## LANGUAGES

English: Cambridge C2 (2015) ·  
Spanish: native · Portuguese:  
intermediate

## PROFILE

I've done this since 2007: business systems, internal tools, websites, and  
now AI features. I'm usually the one person responsible for a project, from  
the first line of code to keeping it running.

*I'm a member of Toptal as an AI engineer. Toptal says it accepts the top 3% of  
applicants.*

## EXPERIENCE

### Technical lead and senior .NET engineer

Sep 2025 - Present

Innovate On Demand · Remote

- Worked on a vehicle finance and lease platform from the first version, with  
a team. I covered architecture, deploy and maintenance.
- Maintain dealer platforms written in Node.js.

### Founder and product lead

2025 - Present

ComerclApp · My own product

- Online store, WhatsApp orders and invoicing in one app, made for owners  
without technical knowledge.
- An AI sales agent answers customers on WhatsApp. The app also works  
offline and syncs later.

### .NET senior developer, globalization solutions

Dec 2017 - Jul 2025

Globalization Partners International · Contractor, fully remote, 7.5 years

- Worked on a translation and localization client portal, including the 2022 UI  
re-design: dashboard, charts and security checks.
- Worked on the translation server that receives the content packages to  
translate and the quote requests.

### .NET semi senior developer analyst

May 2016 - Nov 2017

Globant, J.P. Morgan Chase · Banking, on site at a J.P. Morgan Chase project

- Web and Windows desktop applications for banking operations.
- SQL scripts for data processing, reports and database maintenance.

**Earlier:** Janus Automation (Nov 2013 - May 2016) · AES Argentina (Infoseek and  
self-employed) (Nov 2009 - Jun 2013) · Freelance and Eniac Computación (Jun  
2007 - Nov 2009)
